

Nufail Shaikh

Frontend Engineer

9923313525 · nufailshaikh786@gmail.com · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

Professional Summary

Detail-oriented Frontend Engineer with hands-on industry experience building responsive, user-focused web applications. I follow industry-standard practices and guidelines to ensure clean, structured, maintainable, and readable, high-quality work. Skilled in translating design concepts into clean, maintainable, component-based solutions using the latest modern frontend technologies. Experienced working in Agile environments and collaborating with cross-functional teams to deliver intuitive, visually polished user interfaces. Currently pursuing an MCA and seeking a full-time frontend development role.

Experience

Pronttera

Frontend Engineer Intern

Feb 2026 – May 2026

Pune, Maharashtra

- Converted design mockups into fully responsive, production-ready web pages using React, TypeScript, Tailwind CSS v4, and JavaScript, contributing to a live product across a 3-month internship.
- Designed and maintained 10+ modular, reusable UI components with React Hooks, React Router, and Lucide React, accelerating future feature delivery.
- Diagnosed and fixed frontend performance issues and cross-browser rendering bugs, improving user experience across desktop and mobile viewports.
- Owned tasks end-to-end in Jira, including scoping requirements and estimating timelines, delivering reliably within every sprint cycle.
- Collaborated daily with teammates over Slack, contributing to code reviews and feedback discussions that strengthened team communication.

Projects

StreamVibe

[Live Demo](#)

React.js, Tailwind CSS v4, TMDB API, JavaScript

- Built a full-featured OTT streaming platform UI, integrating the TMDB API to serve real-time movie and TV show data.
- Engineered a content discovery flow with categorized browsing, live search, and smooth UI transitions comparable to top-tier streaming platforms.
- Structured the project with a component-first React architecture and a utility-first Tailwind CSS system for a scalable, maintainable codebase.

Alvy Studio Website

[Live Demo](#)

HTML5, SCSS, CSS3

- Designed and developed a fully responsive website for a fashion branding studio, using CSS animations to convey the brand's creative identity.
- Built a well-organized SCSS architecture using variables, mixins, and partials, simplifying global design changes.
- Delivered a pixel-perfect, mobile-first layout using Flexbox and CSS Grid, achieving consistent cross-browser compatibility.

Education

Master of Computer Applications (MCA)

Currently Pursuing

Allana Institute of Computer Applications & Information Technology, Pune, Maharashtra

Bachelor of Business Administration – Computer Applications (BBA-CA)

2024

Abeda Inamdar Senior College, Pune, Maharashtra

Technical Skills

- **Languages & Styling:** HTML5, CSS3, JavaScript (ES6+), SCSS
- **Frameworks & Libraries:** React.js, Tailwind CSS
- **Responsive Web Development:** Flexbox, CSS Grid, Mobile-First Design
- **Version Control:** Git, GitHub
- **Tools & Collaboration:** Browser DevTools, Jira, Slack, Cursor, VS Code, Canva
- **UI/UX & Architecture:** Design Fundamentals, UX Principles, Component-Driven Development

Certifications

- [Certificate of Internship](#) – Frontend Engineer, Pronttera (Feb 2026 – May 2026), issued by Adeeb Shah, Founder of Pronttera.
